

Custom Shower Component Placement Guide

Before you design:

- Measure floor, walls, ceiling
- Determine user height(s): tallest and shortest users

A: Diverter Control

B: Valve

Typical positioning: 36" from bottom of shower

C, D: Body Sprays

Typical positioning: knee/thigh, hip/waist, shoulder/back

E: Showerhead

Typical positioning: above the head of the tallest user, but within reach of the shortest user
