

Introducing Filis™ Bath Collection

see what Delta can do™

A woman is shown from the chest up, standing under a showerhead. She has her eyes closed and her hands are behind her head, enjoying the water. The showerhead is a wide, rectangular, metallic fixture with a brushed finish. Water is spraying down from it in several vertical streams, creating a misty atmosphere. The background is dark, making the water droplets and the woman's skin stand out. The overall mood is relaxing and refreshing.

Filis™ Bath Collection

Give a clean streamlined aesthetic to your bathroom with the Filis™ Bath Collection. Inspired by modern global design, Filis brings a vibrancy and depth to the bath that is sure to impress. Featuring a full suite of lavatory and shower options, the collection boasts clean, angular lines perfectly tailored for those who seek a contemporary design.

The Filis™ Bath Collection works to blend that sought-after look and feel with transformative function and reliable performance.

- Swivel Aerator – Gives users a fully customizable design that allows you to adjust the water flow upto 6 degrees in any direction.
- H₂Okinetic Showers - H₂Okinetic Showers create the feeling of more water, without using more water. It's all thanks to large water droplets moving in a unique wave pattern that provide warmer, more drenching, and more intense coverage for a totally relaxing shower experience.
- HydraChoice™ - Create a truly custom shower by installing the HydraChoice™ Body Spray System. The flush-mount designs offer adjustability and the ability to change spray options to customize your shower experience even after installation.
